TITLE : VIDEO PROJECTOR

ABSTRACT : PURPOSE: To obtain the multipurpose portable video projector by providing a case with a rear screen which can be folded and a reflecting mirror which can be folded, and independently setting the inclined angles of both the screen the mirror.

CONSTITUTION: The rear screen 6 is coupled with a main body 1 by a screen column 7. The column 7 is an extensible multi-stage pipe and the fulcrum of fitting to the main body, the fulcrum of fitting to the screen 6 are formed in free adjusting pair structure, and the pipe is fixed at an optional angle. The reflecting mirror 5 is held by a mirror column 8, formed in free adjusting pair structure, and set at an optional angle. Those mirror 5, column 8, screen 6, and column 7 are housed in the case of the main body 1 or in the outer edge part. Consequently, the portable video projector which can be used in three ways, i.e. a front and a rear projector with a separate screen and a rear projector with an incorporated screen is obtained.
